STONE

PARTNERSHIP OFFER

GOLOVINSKI
1894

DEAR PARTNERS,

LLC "Golovinsky" specializes in the extraction and processing of natural Volga Blue stone — a rare labradorite with an expressive crystalline structure and rich iridescence.

Thanks to our own quarry and high-performance "pedrini" equipment, we ensure stable volumes of up to 100,000+ sq. ft per month while maintaining impeccable quality.

We are interested in establishing a long-term partnership and would like to offer you the opportunity to showcase Volga Blue slabs in your showroom — either on consignment terms or through another cooperation model aimed at enhancing the commercial appeal of your business and product range.

POLISHED SURFACE

Polished Volga Blue slabs are the benchmark for premium aesthetics.

Their rich black and blue background with shimmering blue highlights creates a depth effect that changes with every glance.

Due to the high gloss level (110–115 units), the polished surface maximally reveals the texture and shine of the minerals. An ideal choice for luxurious interiors and facades.

WHY THIS COULD BE BENEFICIAL FOR YOU:

- Volga Blue is a premium segment stone, highly sought after in luxury interiors and architecture.
- You gain access to a unique, visually rich material that can attract architects, designers, and high- budget clients.
- The sales concept is discussed individually and may include flexible pricing solutions, marketing support, and exclusive terms.
- The entire product range is ready for shipment, and we handle the logistics.

We actively promote the stone through participation in international exhibitions (including Coverings and Marmomac), development of Instagram and LinkedIn platforms, and direct mailings to architects and developers. By partnering with us, your showroom will be presented as our partner in social media, presentation materials, and at international events. This can enhance the recognition of your platform and attract additional traffic.

Available slab size:

- 118"×78"×3/4" (reinforced with a backing mesh)
- 118"×78"×1-1/4"

GOLOVINSKY STONE

All slabs are treated with epoxy resin.

Our materials are suitable for both indoor and outdoor use, thanks to a protective epoxy resin treatment that ensures resistance to all weather conditions.

Key Characteristics:

- **Density:**

True: 2.81–3.02 g/cm³;

Average: 2719–2986 kg/m³ (depending on the quarry layer)

- **Water Absorption:** 0.19–0.30%

- **Compressive Strength:**

Dry state: 101.8–188.1 MPa

Water-saturated state: 84.1–163.5 MPa

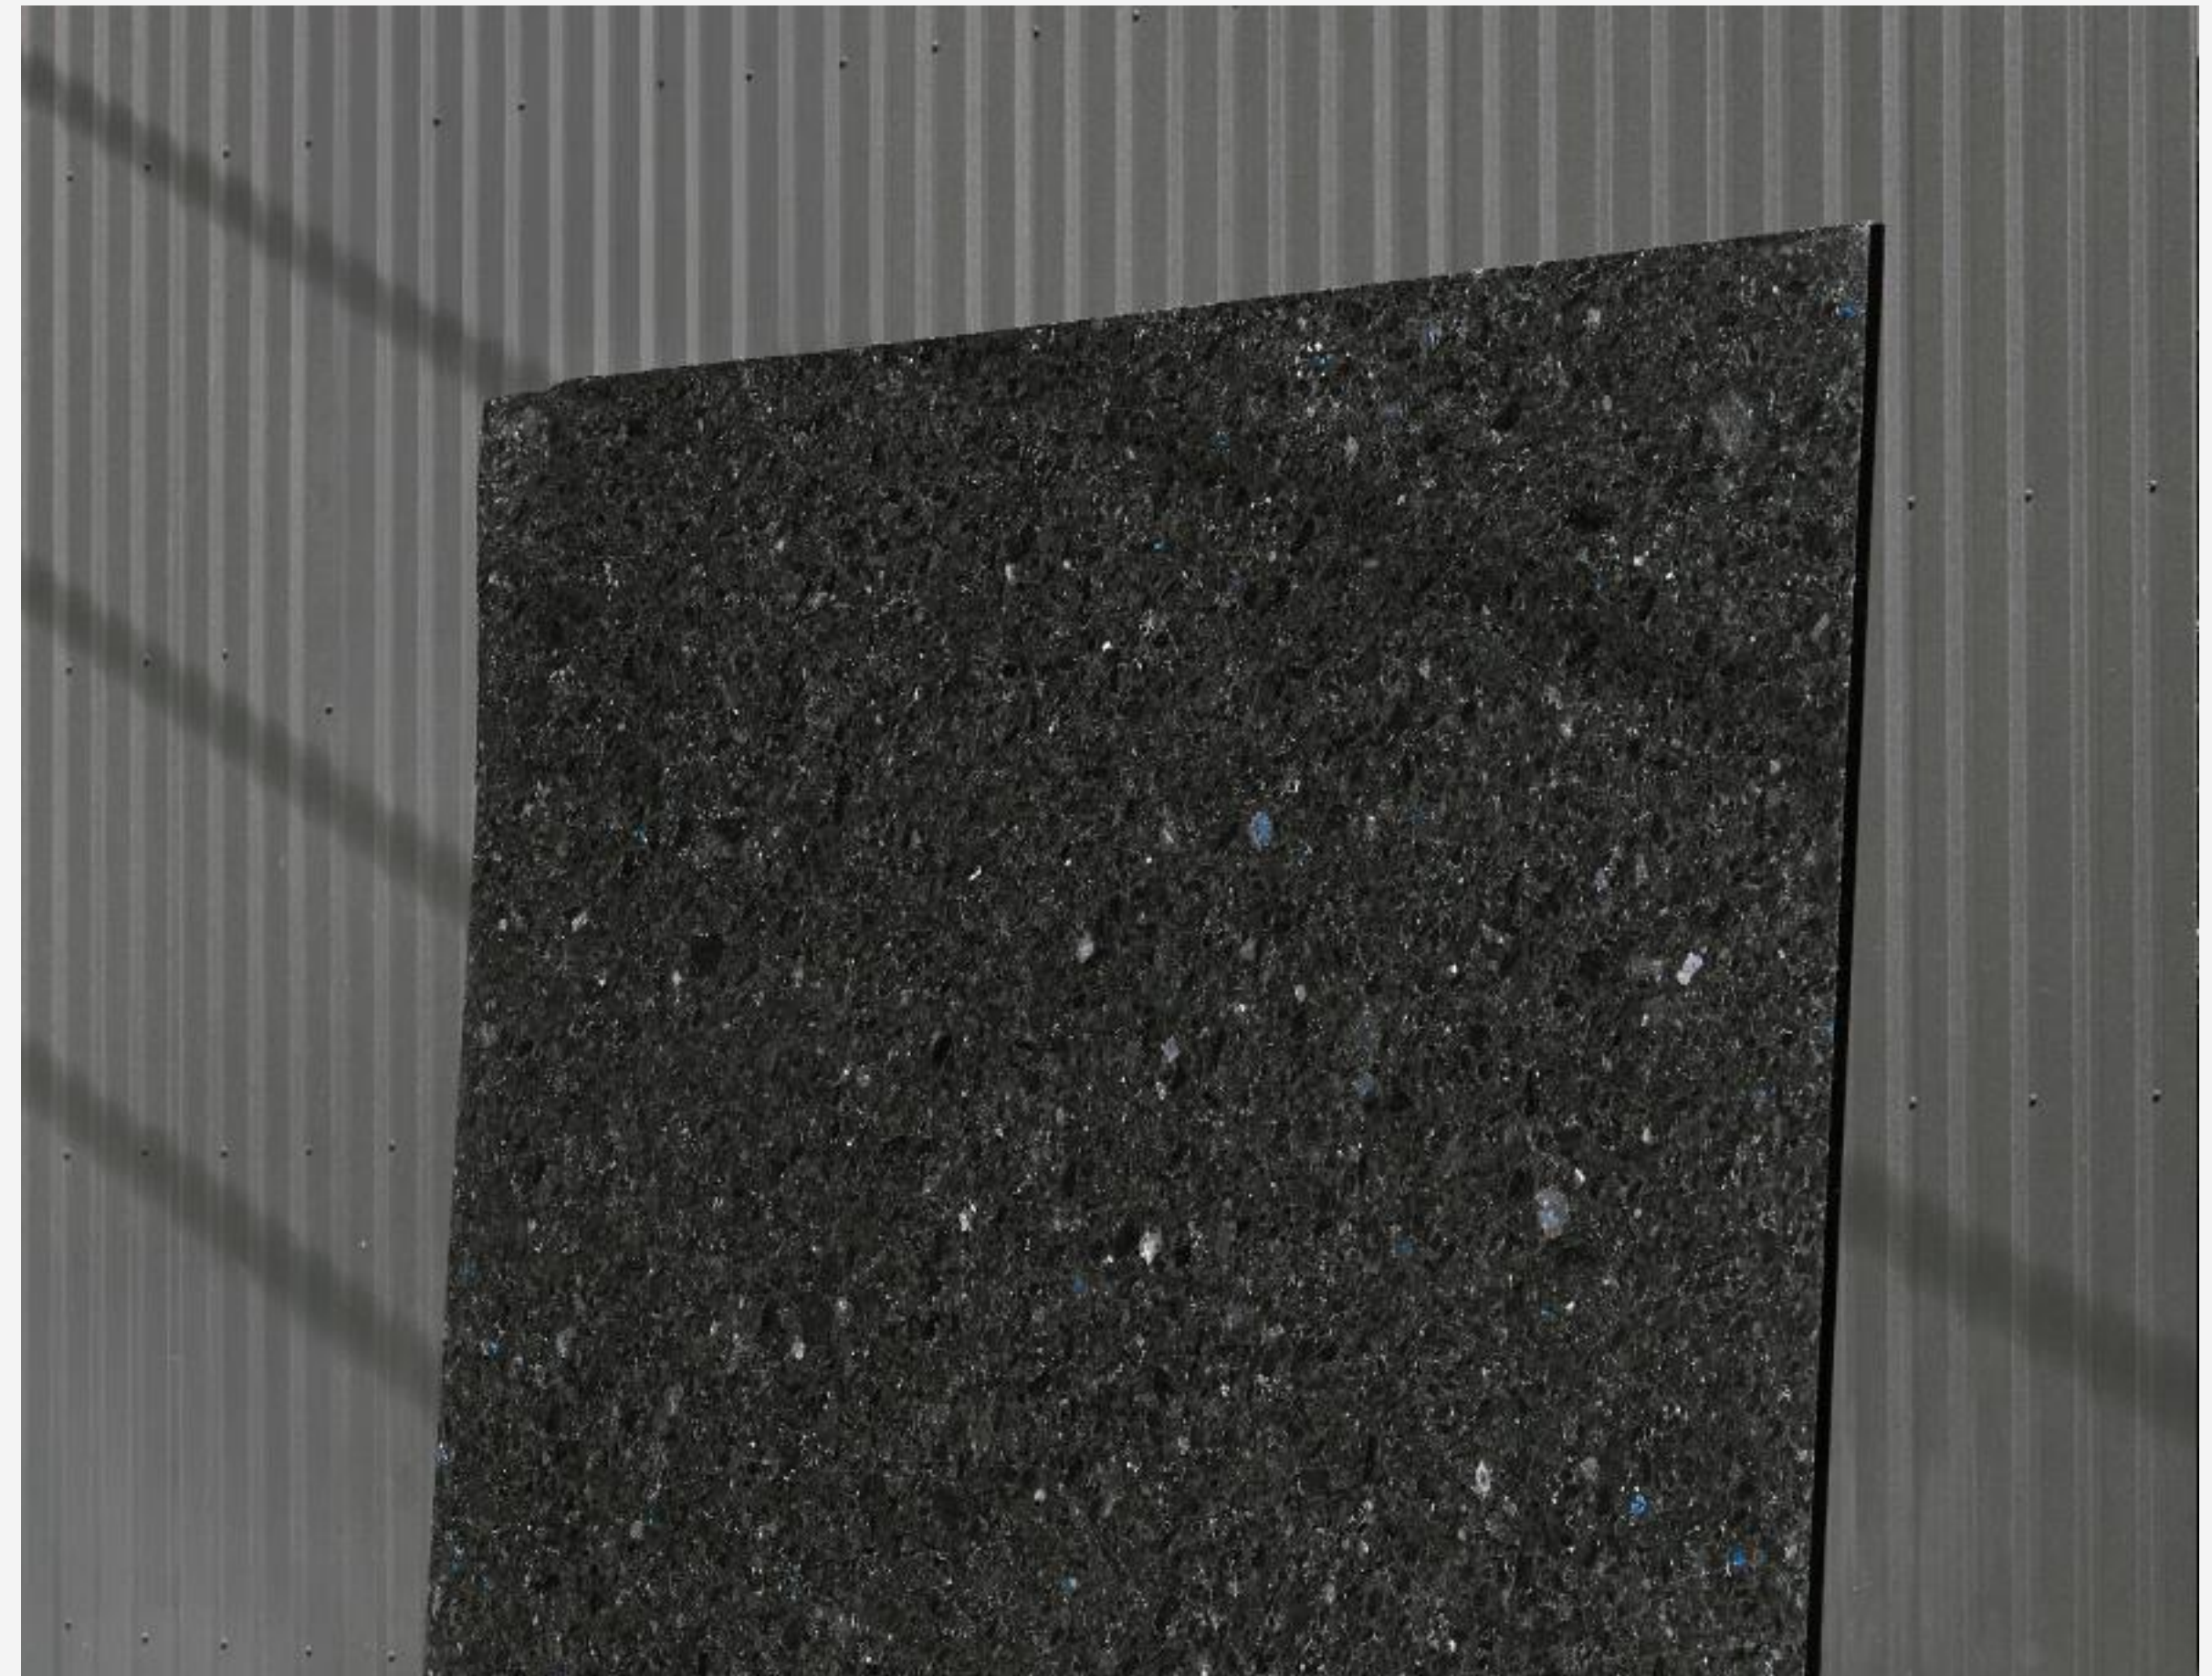

After 100 freeze-thaw cycles: 120.4–127.8 MPa

- **Frost Resistance Grade:** F50–F100

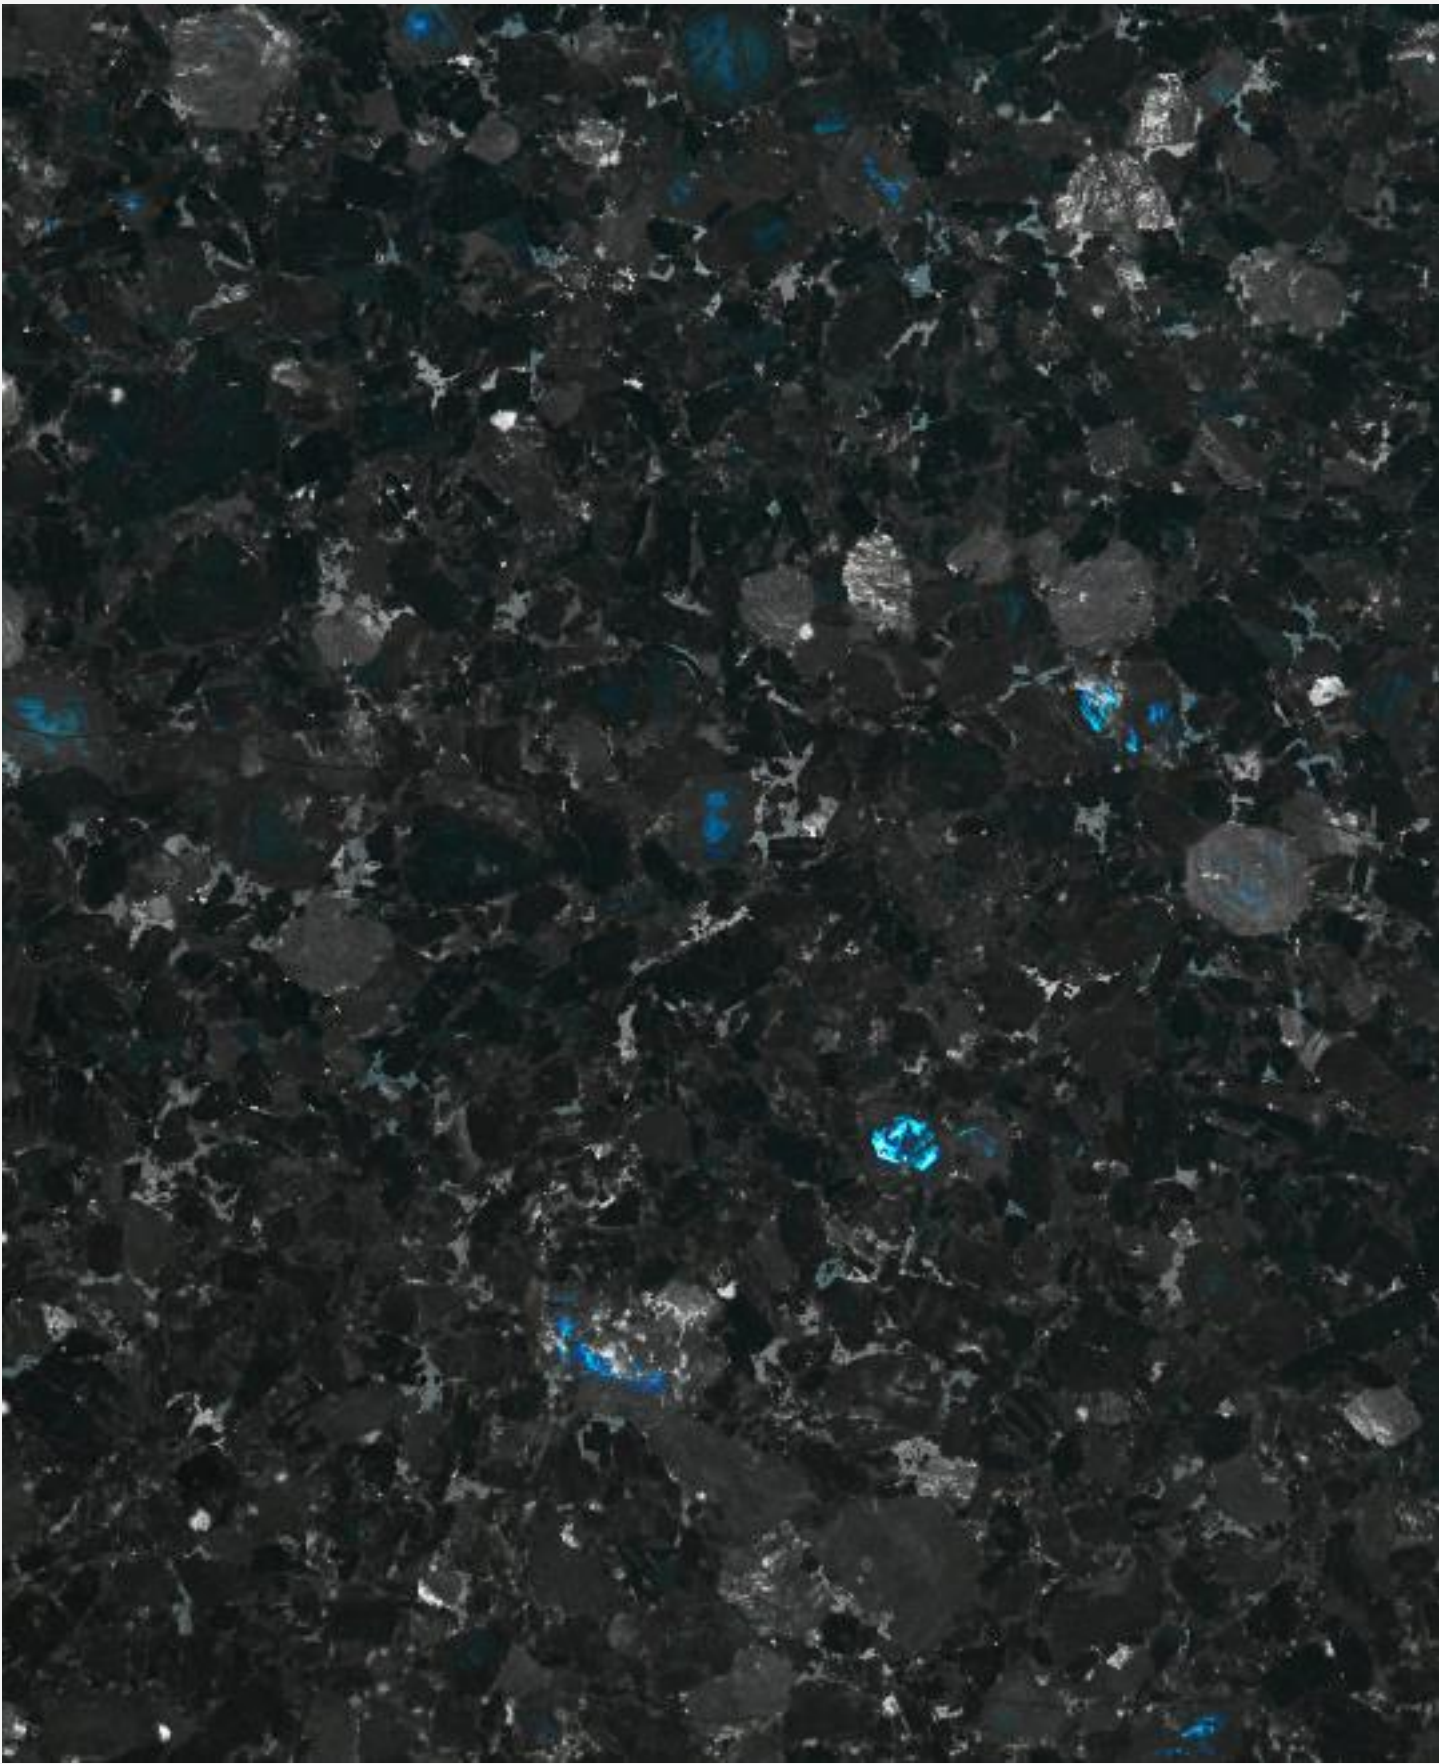

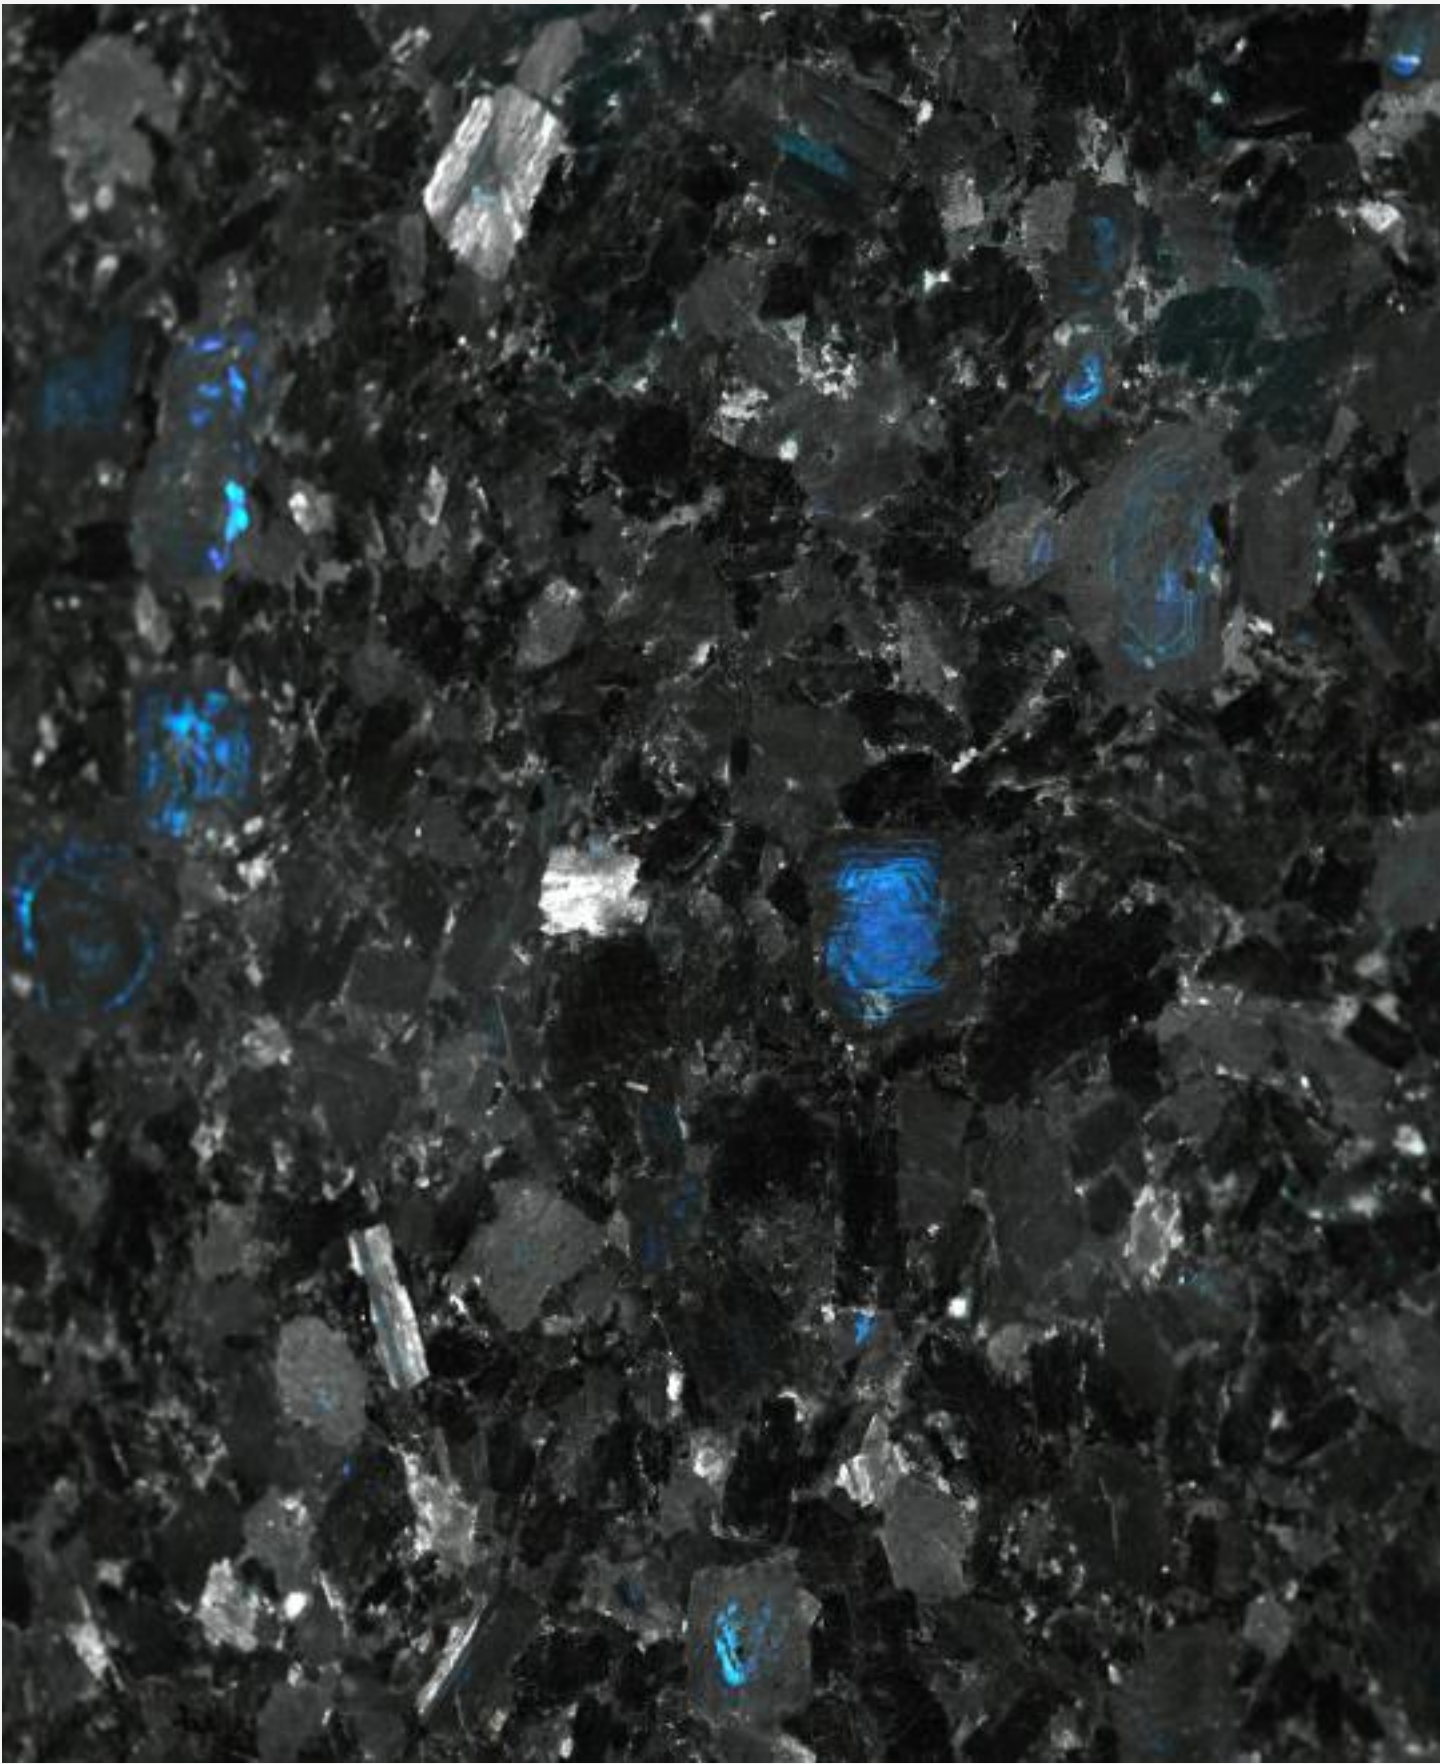

- **Abrasion** (LKI-3 disc): measured in g/cm²

- **Radiation Safety** Class: I

(suitable for all types of construction without restrictions)

Complies with Standards: DSTU B EN1467:2007, DSTU B EN1469:2007

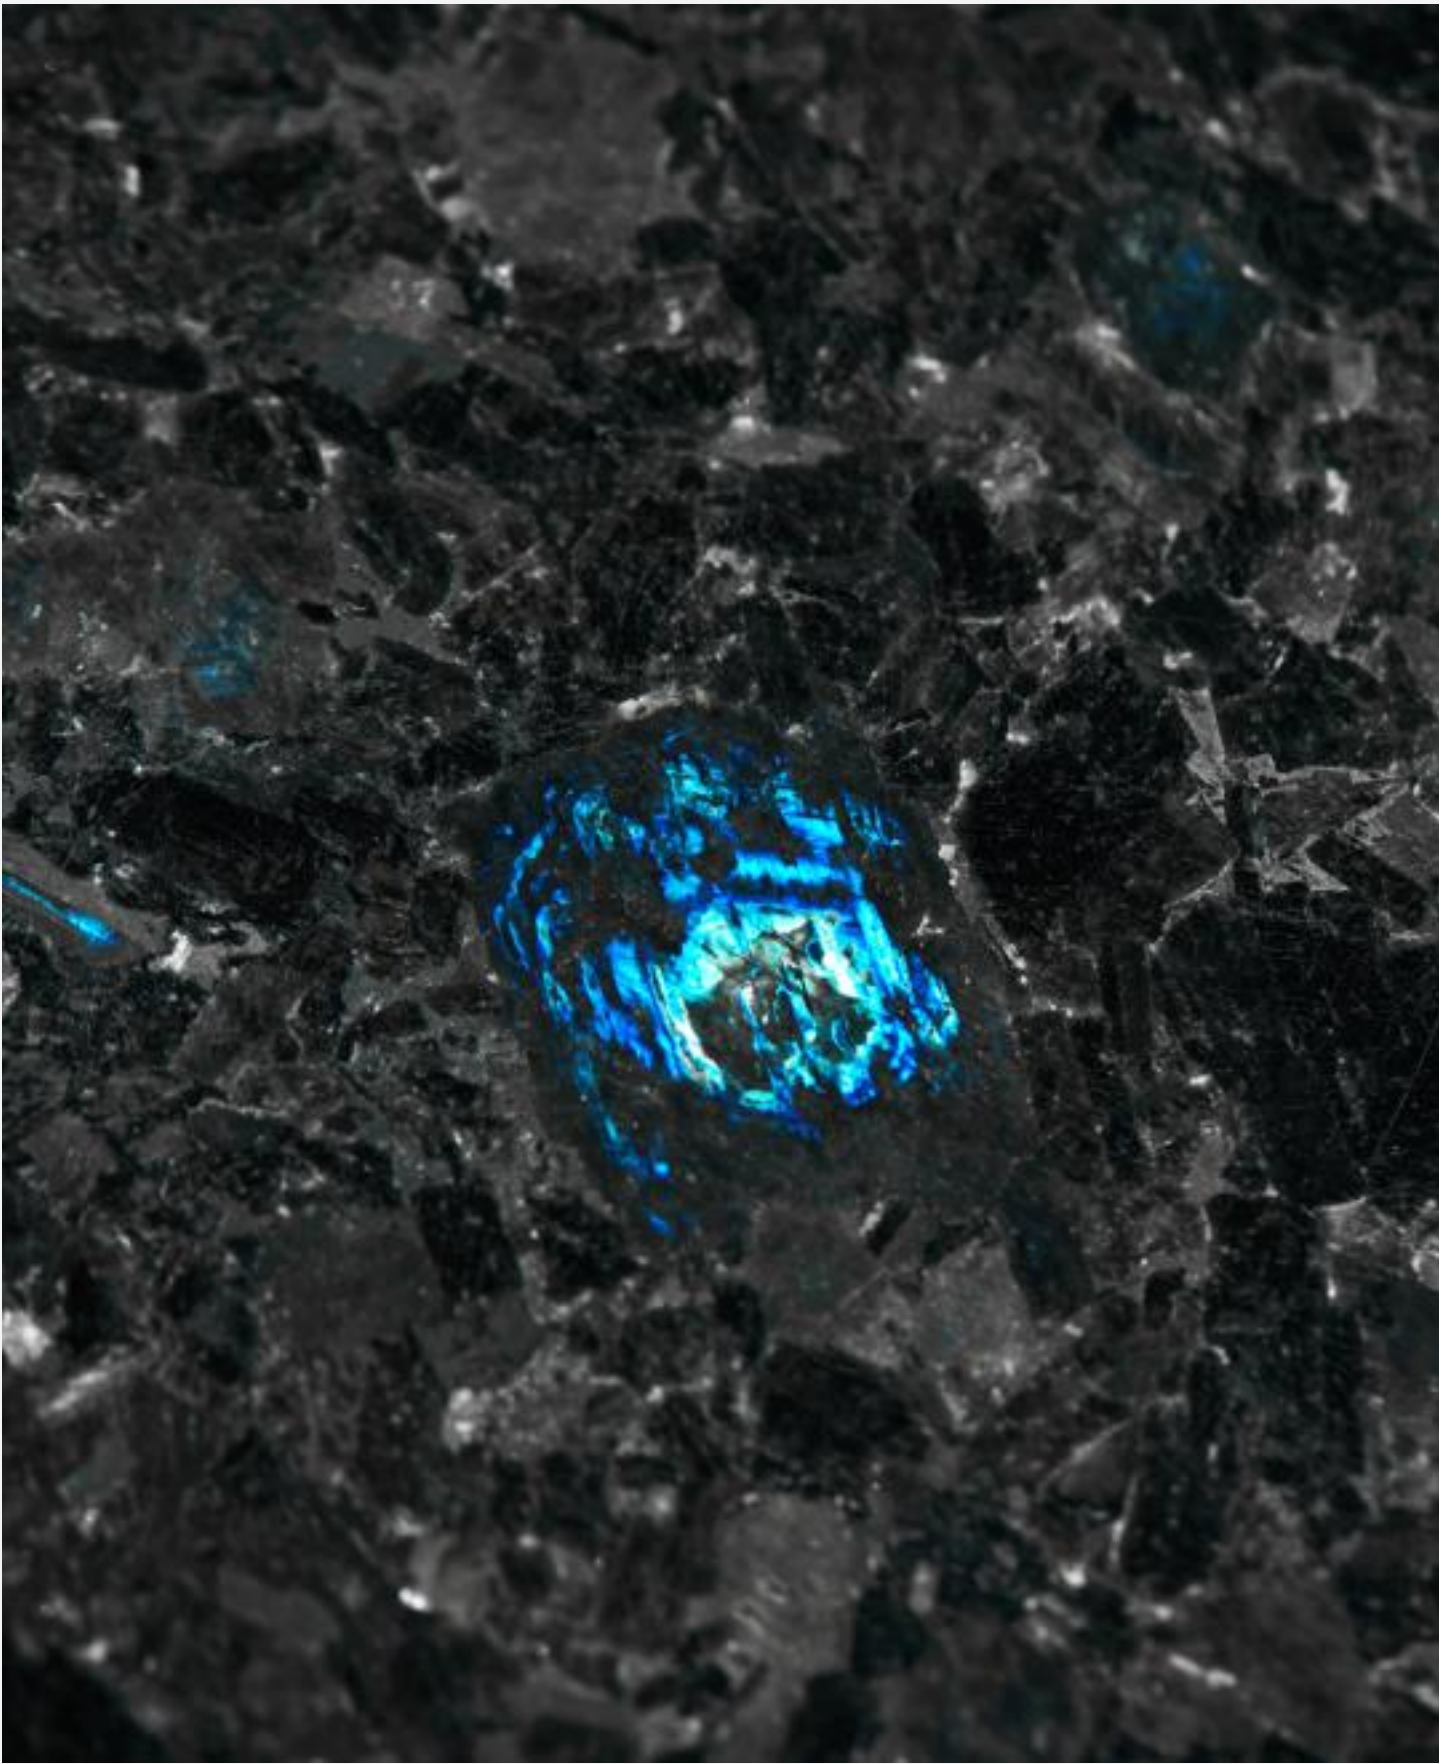

LEATHER (MATTE) SURFACE

Leather finish creates a deep matte surface with a natural tactile texture.

It is a sophisticated solution for designers who seek to combine the natural beauty of stone with modern restraint.

It looks elegant, it feels even better.

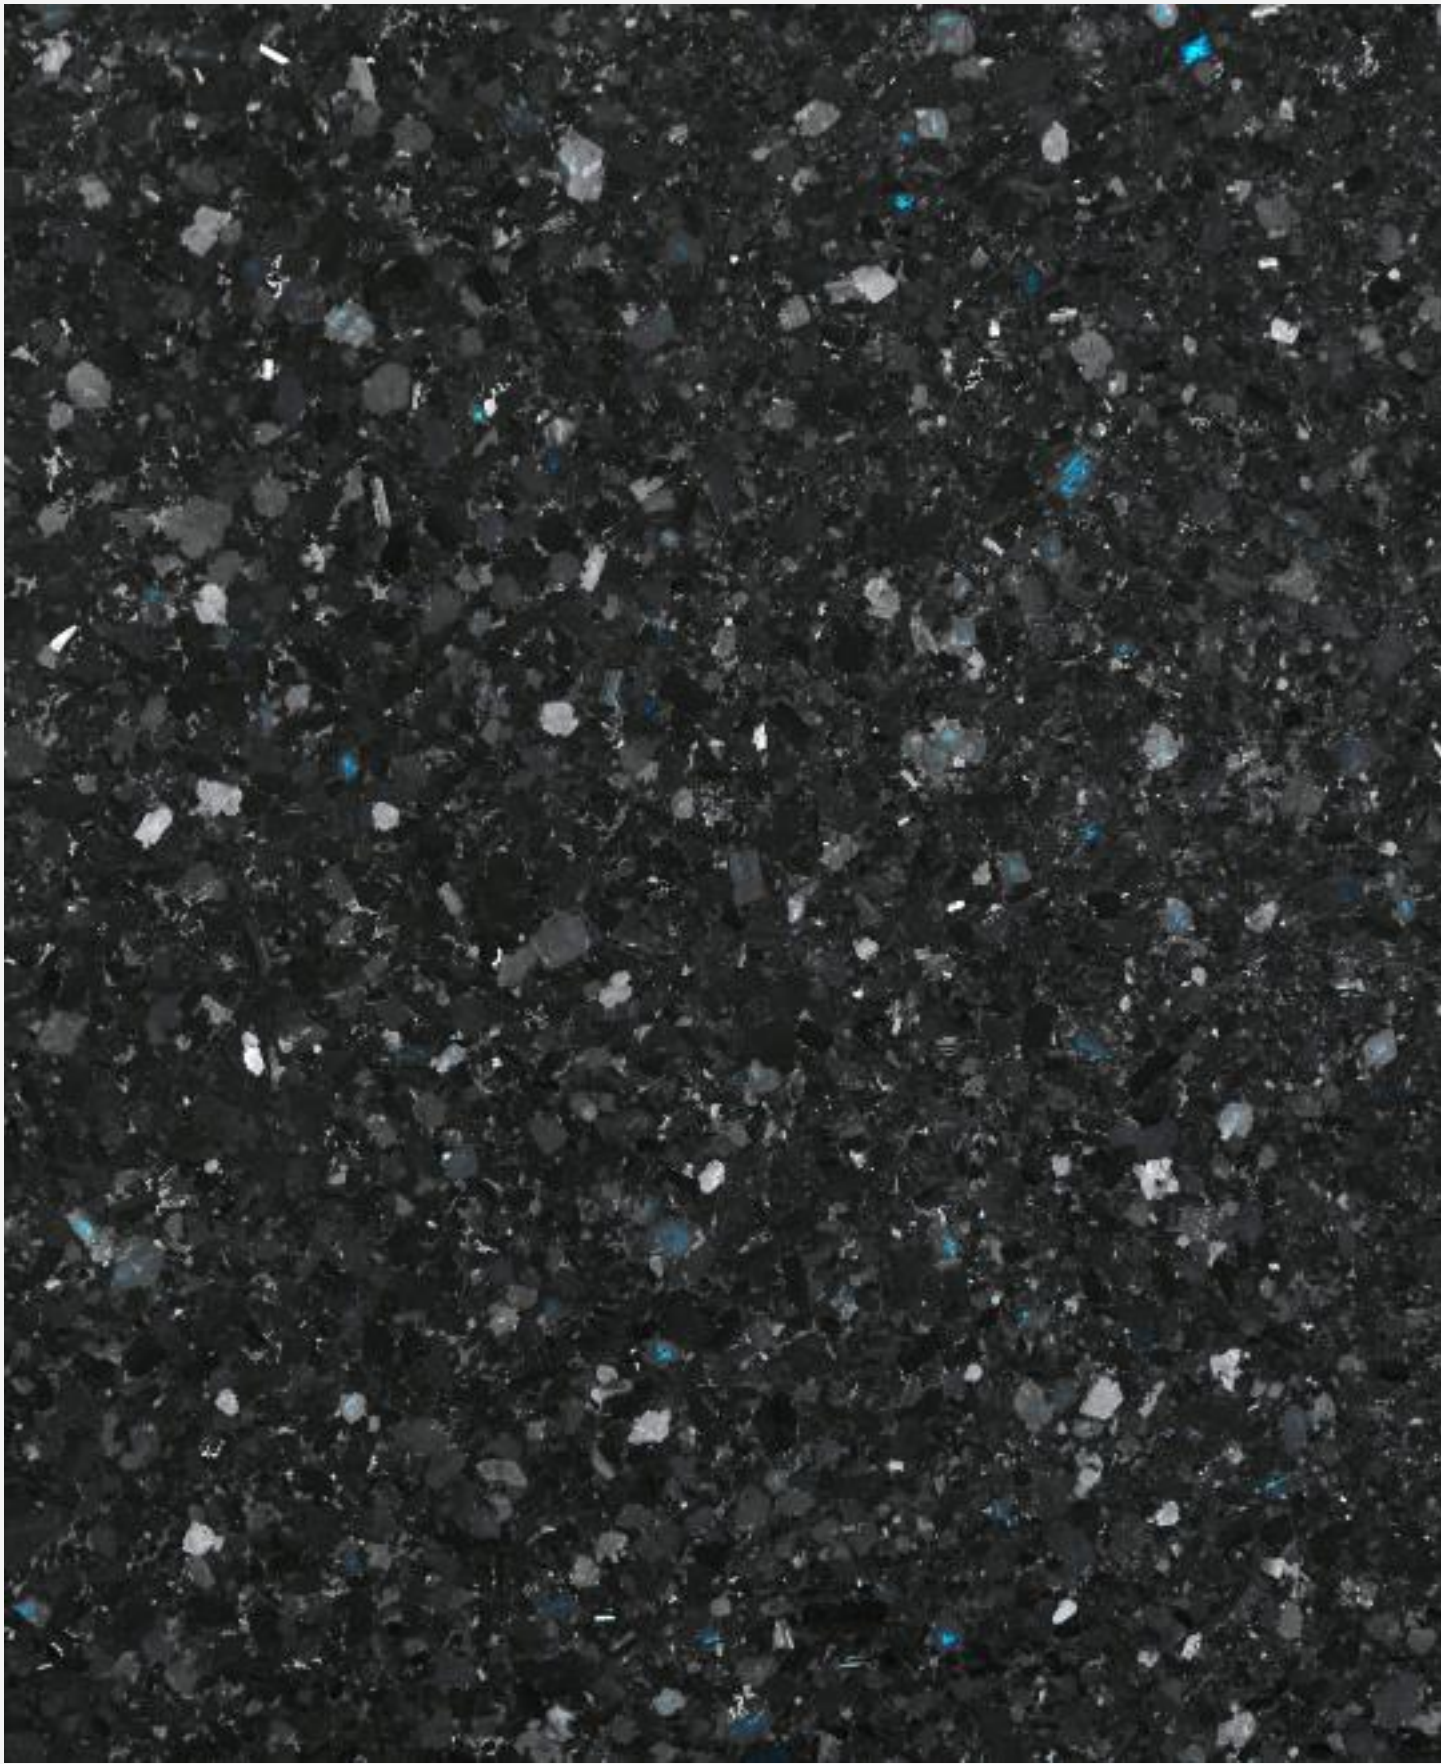

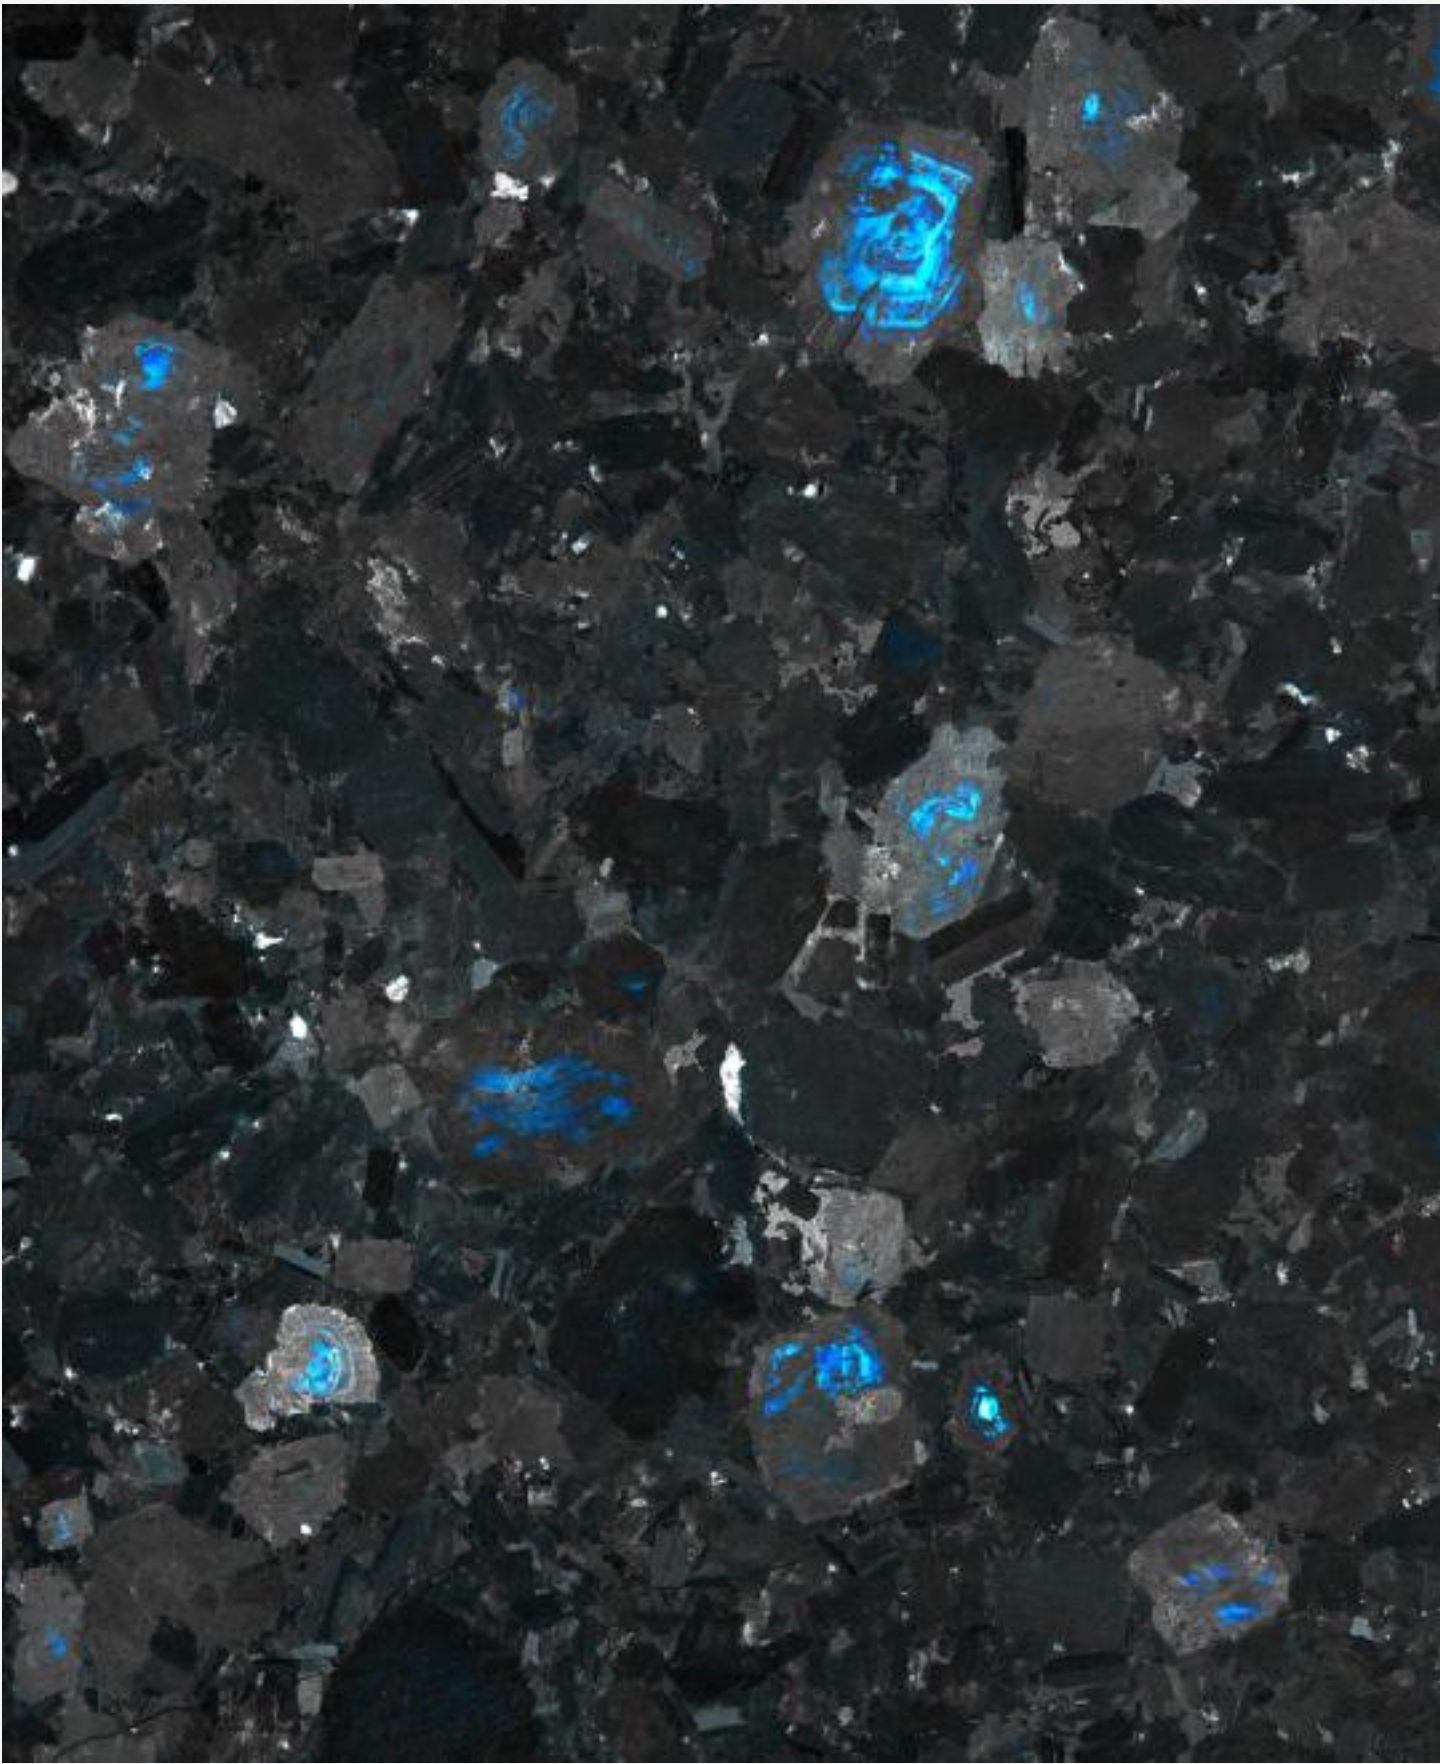

SILK (HONED) SURFACE

The silk finish creates an extremely smooth surface with a delicate sheen.

It is visually warm, soft to the touch, and gives the space a unique atmosphere of calm and elegance.

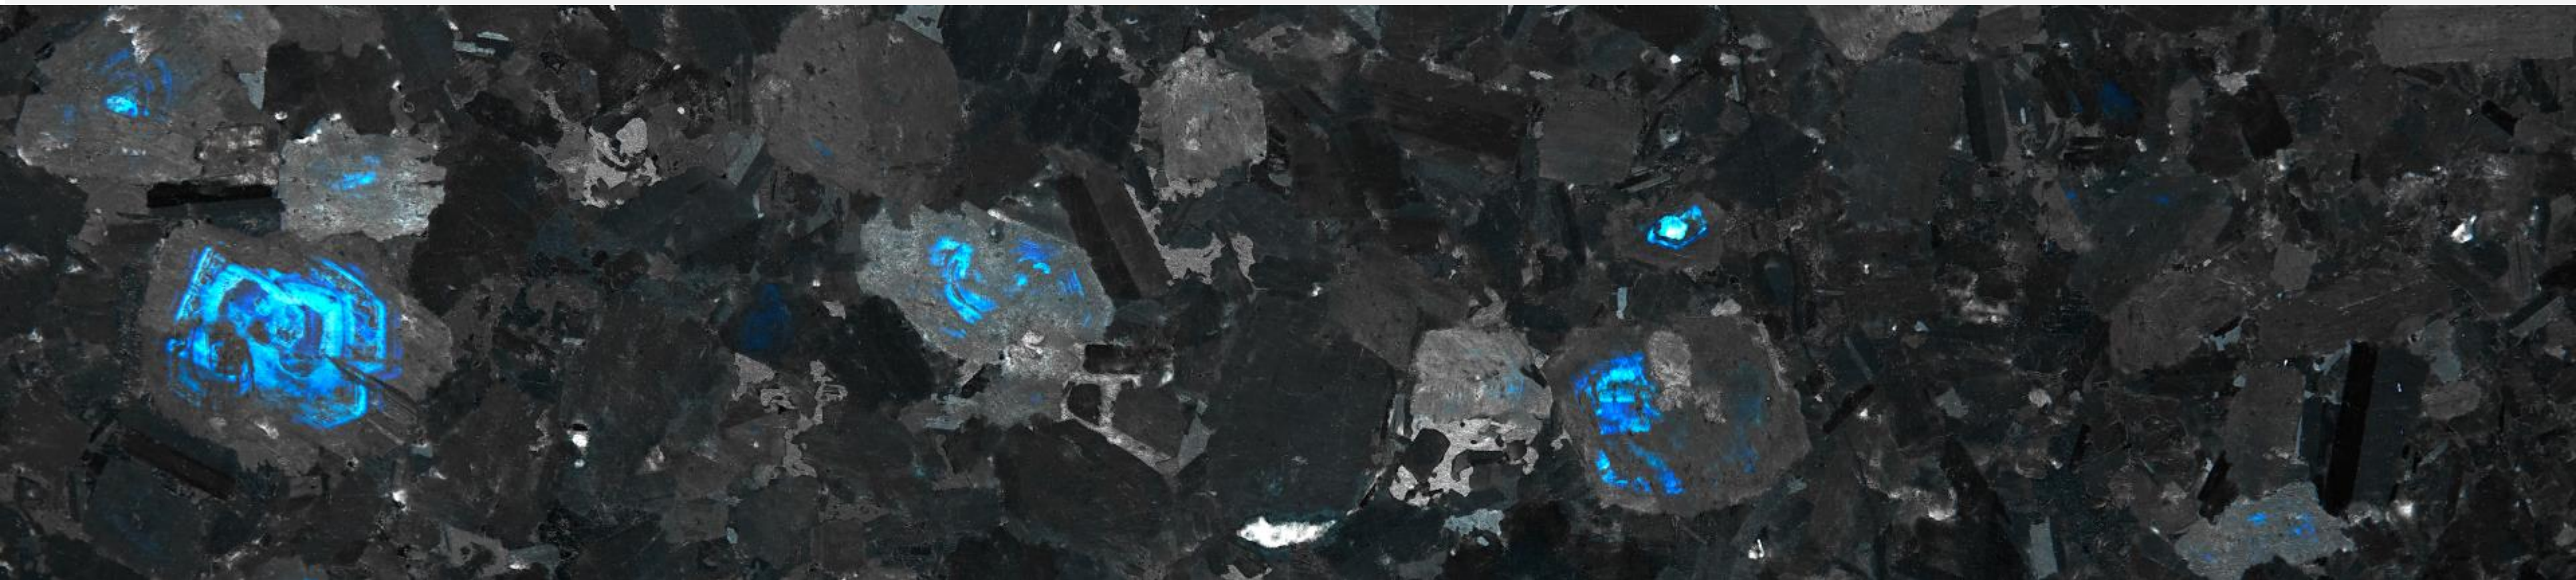

The ideal choice for interiors where every detail is important.

DOUBLE-SIDED FINISH IN 1-1/4" THICKNESS — UPON REQUEST

Choose the material that suits you — by quantity, thickness, and finish type. We'll prepare **a tailored commercial offer** designed specifically for your needs.
